

Wanna Say

Wanna say, been thinkin' 'bout you
Night and day, been tryin' to get through
Wanna say I tried, I know you think I lied
But truth is sometimes hard to see

Live and learn, it's not that easy
Bridges burn, don't say that to me
Time to turn around, and look at what we found
We said it all so carelessly

Something tells me, and compels me to say
We will find a way to make it alright
If you feel it, don't conceal it, reveal
What you really feel
Open up your heart again

Look at me, still fallin' for you
Can't you see, not broken, but blue
Every choice we make, a chance we have to take
In life there is no guarantee

Something tells me, and compels me to say
We will find a way to make it alright
If you feel it, don't conceal it, reveal
What you really feel
Open up your heart again

Such a shame, it makes me crazy
Who's to blame, did we get lazy
Wasting time feeling sad
Don't forget what we had

Something tells me, and compels me to say
We will find a way to make it alright
If you feel it, don't conceal it, reveal
What you really feel
Open up your heart again
Open up your heart again
Open up your heart again

Open up your heart
